

V&G400 SERIES

A REVOLUTION IN ENDMATCHING!

The V&G400 machine handles variable lengths, therefore sorting of your lumber for lengths is not required. Waste will be reduced to a minimum. Reducing the loss of the total length to under 1% is possible. Holding and stabilizing the boards while cutting results in a straight clean cut. A support prevents the back from splintering.

TECHNICAL FEATURES:

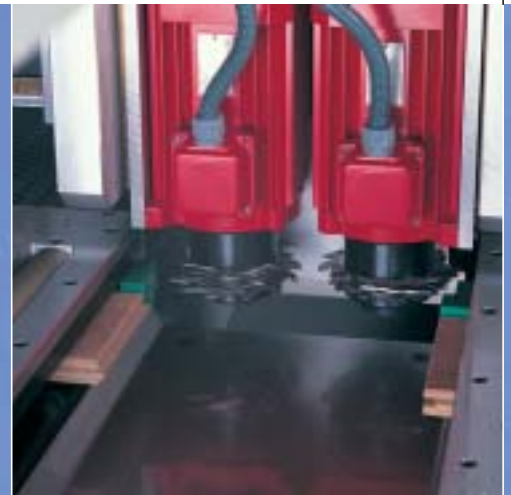

- Machine handles variable lengths
- No loss of material
- Square angle guaranteed
- Straight clean cut
- No difference in height
- No splintering
- Direct driven high speed motors
- Low noise (less than 80dB(A))
- Userfriendly operation
- Minimum of maintenance
- Supply of customized tooling possible

TECHNICAL DATA:

- Dimensions : WxDxH = 2000x1360x1900mm.
- Weight : Appr. 1750 kg.
- Feed rate : up to 80 m/min.
- Speed : up to 15 pieces/min.
- Total power : Appr. 20 kW

OPTIONS:

- Accurate fix length system
- Length measuring system
